Discussion:

I. Colliers update on Master Plan: Stage I scheduled for September 2022; Stage II scheduled for February 2023.

Updates on visioning and educator input: Colliers scheduling expanded teacher visioning at each school that should be concluded in May. Colliers will also reach out to town planning and other departments including police and fire just to get everyone on board with the process. The HS architecture students gave presentations to Colliers and will be presenting to the building committee at our next scheduled meeting in June.

Colliers will compile all feedback from these sessions and prepare a packet for the BC for discussion at our next meeting in June. Colliers will also create a process timeline that identifies milestones and action items for the BC between now and the Stage II submission date. The goal is to have another presentation before the SC by mid August, in advance of the Stage I submission, and ramp up community participation beginning with the start of the new school year. Some discussion of engaging PR/Marketing assistance, but no specific recommendations were made.
